ISAAC HARRISON TEMBO

COMPUTER SCIENTIST LUSAKA, ZAMBIA +260779688852

React | TypeScript | Tailwind CSS | SQL | DynamoDB | MySQL | PostgreSQL | MongoDB | Java | C++ | Design Patterns | API Data Integration | GraphQL | Figma

DETAILS

Location: Lusaka, Zambia
Phone: +260 77 9688852
Email: isaacharrison2808@gmail.com
Nationality: Zambian

SKILLS

- Ability to Multitask
- Self-motivated with a passion for continuous learning and professional growth.
- Effective Time Management
- Ability to Work Under Pressure and Ability to write code. (programming)
- IT supporting skills
- Attention to detail and commitment to code quality
- Practical, analytical and result oriented
- Strong collaborative problem-solving skills.
- Excellent analytical and critical thinking abilities.
- Strong team player with the ability to work independently.
- Excellent communication, report writing, and presentation skills.

1. PROFILE

Highly analytical and results-oriented Full-Stack Engineer with a strong foundation in Computer Science and hands-on experience building production-grade web and desktop applications. With over two years of experience across educational technology and enterprise systems, I specialize in translating complex business requirements into scalable, customer-oriented software solutions that support strategic decision-making.

Proficient in JavaScript/TypeScript, React, Node.js, and SQL/NoSQL databases, I have hands-on experience in front-end development, backend architecture, REST API design, and cloud deployment. I design, develop, and maintain full-stack systems including educational platforms, CRM solutions, and e-commerce integrations; ensuring solutions are scalable and production-ready.

I bring a proven ability to build end-to-end software solutions, from database design and backend engineering to frontend development and deployment, while adhering to best practices in version control and collaborative development. I excel in working with cross-functional teams to deliver software that enhances efficiency, innovation, and organizational performance.

2. CAREER OBJECTIVE

Applying

To secure an industrial attachment or Internship role where I can leverage my expertise in full-stack development, web application systems, and collaborative problem-solving to further learn from industry professionals on how to deliver scalable, customer-oriented software solutions. I aim to translate complex business challenges into well-structured engineering problems by applying modern development practices, clean architecture, and continuous learning.

I will support organizational goals by designing, developing, and maintaining large-scale systems, integrating frontend and backend technologies, and contributing to high-impact, production-ready applications. With a strong foundation in React, Node.js, TypeScript, and cloud services, I seek to contribute to innovative engineering teams while maintaining high standards of code quality, collaboration, and professional growth.

3. HIGHLIGHTS

Category	Skills & Technologies
Frontend Development	React, Typescript, Tailwind CSS, Figma
Backend	Node.js, Express, Java, REST APIS, GraphQL APIs

○ HOBBIES ○

1. Travelling.
2. Watching YouTube.
3. Making Friends.
4. Learning new stuff.
5. Running.
6. Listening to Music.
7. Playing football.

Databases	PostgreSQL, MySQL, MongoDB, DynamoDB
Cloud and Tools	AWS (Amplify, S3, AppSync), Git, GitHub, NPM, Lucid Charts

4. EMPLOYMENT HISTORY

4.1. JUNIOR SOFTWARE ENGINEER | HERO CONTROL SYSTEMS LLC

Period: June 2024 - April 2026 | Location: Lusaka, Zambia (Remote)

Duties

- **Educational Platform Development:** Developed a commercially marketed educational platform used by 6+ schools across Zambia, enabling teachers to deliver interactive STEM lessons using Virtual Labs.
- **Interactive QUIZ Functionality:** Engineered a dynamic quiz functionality for the offline-first desktop version, allowing teachers and learners to track real time progress, improving lesson engagement.
- **CRM System Development:** Built and maintained a Customer Relationship Management (CRM) system used by the company's corporate clients nationwide to manage client interactions and sales pipelines.
- **E-Commerce Integration:** Contributed to the company website by integrating an e-commerce feature for purchasing electronic components, streamlining the order process for customers using Mobile money payments.
- **Full-Stack Collaboration:** Built automated data processing pipelines using Python and Power Query, improving data quality, availability, and readiness for analytical modeling and production use.
- **Cross-Functional Collaboration:** Worked across the stack to design, develop, and maintain web and desktop applications, ensuring scalability, performance, and alignment with business objectives.

4.2. SOFWARE ENGINEERING INTERN | HERO CONTROL SYSTEMS LLC

Period: April 2023 - November 2023 | Location: Lusaka, Zambia (Remote)

Duties

- **Internal Application Development:** Pioneered the development of an internal employee and inventory management application.
- **Backend Architecture Design:** Assisted in designing the backend architecture for the internal system, ensuring scalability and data integrity across multiple departments.
- **Cross-Functional Support:** Collaborated with team members to implement features, troubleshooting issues, and support the delivery of internal tools.

EDUCATION

5. EDUCATION & PROFESSIONAL ADVANCEMENT

- **Bachelor of Science (BSc) in Computer Science Copperbelt University (Expected Graduation: 2027).**

6. AWARDS, CERTIFICATIONS AND ACHIEVEMENTS

- **Short Courses:** Figma, Version control with Git and GitHub.
- Backend Development – FreeCodeCamp.org
- Frontend Development with React and Typescript – Udemy
- CS50 – HarvardX via edX
